EDUCATION

Presbyterian College, Clinton, SC — *Computer Science, Mathematics*

Fall 2019 - Spring 2023

Skills

Front-End Frameworks— React *and Angular*

Generally works with the React library, but has experience working with Angular and a good bit of familiarity with Vue and Svelte. With React specifically, I've worked with Create React App, Nextjs, and Gatsby.

State Management— *Redux and Mobx*

Worked with and made a few example small fun projects (Up on Github) just to learn how it actually works. Also, has implemented it in a few projects on Github

Bundling — *Webpack and Parcel*

Learned to host a single Django App on Heroku where the front end was done with React.

Hosting Web Apps— *Netlify, Vercel, Heroku, Azure, AWS, and GCP*

Mostly work with Netlify, but has experience working with cloud platforms and popular hosting platforms.

Back-End Frameworks — Django, Flask, and Node

Proficient with Django and it's the Rest Framework and Flask with experience in Node.

Projects

Therapist Website — *An individual website made for a therapist*

- Still creating but code is on Github
- https://albrown-site.netlify.app

Personal Website — Personal Website with Resume

- Made when learning first learning React

Basic Blog — Made when learning Flask

- My first ever web development project
- MVC based backend
